100% GREY COVERAGE

- AMMONIA FREE
- EFFORTLESSLY BLEND AWAY ROOTS IN JUST 10 MINUTES
- NATURALLY RADIANT COLOUR AND SHINE
- ENRICHED WITH 3 NATURAL OILS

THIS BOX CONTAINS

Everything you need to seamlessly blend away your roots between your Naturtint® applications!

NATURTINT® ROOT RETOUCH HAIR COLOURANT 15 ML
Free from ammonia and enriched with active plant-based ingredients, to care for hair during colour. Contains Toluene-2,5-Diamine Sulphate [see website for more information].

NATURTINT® COLOUR DEVELOPER 15 ML
Gently enables the colourant to penetrate deeply into the hair, giving long lasting permanent colour. Contains Hydrogen Peroxide [see website for more information].

NATURTINT® PROTECTIVE CONDITIONER 15 ML
Enriched with **Natural Hydrolysed Wheat Protein** which reduces hair breakage by up to 80%, increasing volume, strength and shine. **Organic Sunflower Extract, Linseed Extract and Lemon Fruit Water** help to detangle your hair, protect it against external hair damage and prolong the life and vibrancy of your colour.

PROTECTIVE GLOVES
To protect your hands from staining during the colouring process.

MIXING BOWL & PRECISION BRUSH APPLICATOR
To easily mix and apply the hair colour.

INSTRUCTION LEAFLET
Please read the instructions for use carefully.

NATURAL & ORGANIC INGREDIENTS FOR HEALTHIER HAIR

At Naturtint®, we choose the very best ingredients for our hair colours, selecting natural and organic plant and seed oils and extracts wherever possible, to give you:

- MEADOWFOAM SEED OIL**
Helps to care for your scalp during the colouring process.
- ARGAN OIL**
Rich in omega 6 fatty acids and natural tocopherols that help to strengthen and nourish the hair.
- CRAMBE ABYSSINICAN**
Provides natural lustre, whilst moisturising and softening hair.

- SUNFLOWER EXTRACT**
Prolongs colour thanks to its powerful antioxidant effect, protecting the hair from environmental damage.
- HYDROLYSED WHEAT PROTEIN**
Helps to repair hair fibres from within.
- LINSEED SEED EXTRACT & LEMON FRUIT WATER**
Moisturise and soften hair, whilst refreshing the scalp.

WHICH IS THE RIGHT SHADE FOR YOU?

- **Dark Brown:** Suitable for root application on hair that has been previously coloured with Naturtint® 2N or 3N.
- **Light Brown:** Suitable for root application on hair that has been previously coloured with Naturtint® 4N, 4G, 5N, 5G or 5.7. Not suitable for copper, red or intense shades.
- **Dark Blonde:** Suitable for root application on hair that has been previously coloured with Naturtint® 6N, 6G, 6.7, 7N or 7G. Not suitable for copper, red or intense shades, or hair darker than a level 4.
- **Light Blonde:** Suitable for root application on hair that has been previously coloured with Naturtint® 8N, 8G, 9N or 10N. Not suitable for copper, red or intense shades, or hair darker than a level 6.

BEFORE YOU START - CHECK YOUR SKIN SENSITIVITY AND EXPECTED COLOUR RESULT BY COMPLETING THE FOLLOWING 2 TESTS:

SKIN SENSITIVITY TEST

Any cosmetic product can cause an unexpected allergic reaction and, for this reason, a skin sensitivity test must be carried out before each and every use, for 48 hours, before colouring your hair - even if you are a regular user of hair dyes. If your scalp is irritated, or you have damaged or broken skin, do not complete the skin sensitivity test and do not colour your hair until your scalp is fully healed. Be aware that even if a sensitivity test has been carried out you may still experience an allergic reaction when you colour your hair. The sensitivity test is an important precaution but it is not a guarantee to avoid future allergic reactions.

HOW TO PERFORM A SKIN SENSITIVITY TEST:

- 1 Remove any earrings. Cleanse a small area (1-2cm) of skin behind your ear and on your inner elbow and dry gently.
- 2 Put on the gloves provided and carefully unscrew the caps from the **Colourant (1)** & the **Colour Developer (2)** bottles.
- 3 In a plastic bowl, using plastic utensils, mix a small amount (in equal measures) of the **Colourant (1)** & the **Colour Developer (2)** until totally blended. Do not use a metal bowl or metal utensils. Reseal both bottles immediately to preserve the contents ready for full application 48 hours later.
- 4 Using a cotton bud, apply the mixture to the cleansed area behind your ear and on your inner elbow and allow it to dry.
- 5 Then apply 2 more layers, each time allowing the areas to dry in between.
- 6 Leave the test mixture on the skin for at least 48 hours without washing, covering or touching the test area.
- 7 If you experience any signs of a reaction, such as swelling, redness, blistering, rash or itching, in or around the test area, you are sensitive to one or more of the ingredients within the formula - **RINSE IMMEDIATELY AND DO NOT USE THIS PRODUCT ON YOUR HAIR.**

COLOUR STRAND TEST

Your final colour result will depend on the colour, thickness and overall condition of your hair. To ensure you will be pleased with your Naturtint® colour, we advise you to carry out a colour strand test to identify your expected final colour result and the development time required to achieve it.

HOW TO PERFORM A COLOUR STRAND TEST:

- 1 Use the same mixture you prepared for your skin sensitivity test.
- 2 Cut a small section of your hair from the root (approximately 3cm wide) and, wearing the gloves provided, completely cover with the mixture.
- 3 Rinse the hair clean after 10 minutes. In the case of stubborn grey, or to achieve a more intense colour, leave the mixture for a further 5-10 minutes.
- 4 Gently dry the section of hair to reveal your colour result, remembering to take a note of your hair's specific development time.

TIP: secure the strands of hair at one end with some sticky tape.

OUR HAIR COLOUR HELPLINE

If you have any questions or queries please call our helpline on

+44 (0) 345 601 8129 or email help@naturtint.co.uk

Our team of hairdressers and colour technicians are on hand to make sure you get the very best colour results. You'll also find lots of hints, tips and colour advice on our website www.naturtint.co.uk

INSTRUCTIONS FOR USE – FOLLOW THESE STEPS

If your sensitivity test (see BEFORE YOU START section) showed no reaction then you can now colour your hair. Although very unlikely, you may still go on to have a reaction during the full colouring process. Please read the specific cautions section of this leaflet carefully.

STEP 1: PREPARE AND MIX UP YOUR COLOUR

Ensure your hair is dry and clean, as a build-up of styling products can affect your colour result. We recommend colouring your roots the day after washing, to allow some of the scalp's natural oils to be produced. This will further help protect your scalp during colouring. Comb your hair before application, leaving the roots visible: top part, crown, temples, depending on the hairstyle. **Always wear the gloves provided and ensure you have all the utensils you may need to hand.**

1. Protect your shoulders with a towel to prevent accidental staining of your clothes. You may also wish to protect the immediate surrounding area, especially any carpets or fabric, as permanent staining may occur if colour mixture is accidentally spilt.
2. **Put on the gloves** provided and keep them on during the whole colouring process.
3. Unscrew the caps of both the Colourant (1) and Developer (2) and pour or squeeze out the total contents into the mixing bowl. Mix using the applicator brush for 2 minutes until totally blended.

STEP 2: APPLY YOUR COLOUR

1. Apply the mixture to your roots using the applicator brush, ensuring the hair is completely covered. Do not massage the product through the rest of the hair.
2. Leave the mixture to develop for 10 minutes (20 minutes if you have stubborn grey).

STEP 3: RINSE AND CONDITION

1. Once you have reached your desired development time, **using gloved hands**, gently massage your hair whilst thoroughly rinsing it with warm water until the water runs clear.
2. Cleanse your hair with your regular shampoo to ensure all hair colour is removed, then gently squeeze excess moisture from your hair.
3. Then apply Naturtint® Protective Conditioner to help detangle your hair, add strength and boost shine. Gently massage through from the roots to the tips. Leave for 2-5 minutes then rinse thoroughly. Dry and style as normal!

STEP 4: CARING FOR YOUR COLOUR

To continue to care for and protect your hair, use Naturtint's full range of aftercare and styling products which have been specifically developed for coloured hair.

ROOT RETOUCH

NATURTINT®

Crème

PERMANENT HAIR COLOUR 100% GREY COVERAGE

SAFETY INSTRUCTIONS: READ AND FOLLOW INSTRUCTIONS BEFORE USE

WARNING HAIR COLOURANTS CAN CAUSE SEVERE ALLERGIC REACTIONS

This product is not intended for use on persons under the age of 16. Temporary "black henna" tattoos may increase your risk of allergy.
DO NOT COLOUR YOUR HAIR IF:

- You have a rash on your face or sensitive, irritated and damaged scalp.
- You have ever experienced any reaction after colouring your hair.
- You have experienced a reaction to a temporary "black henna" tattoo in the past.

Contains phenylenediamines (toluenediamines) and hydrogen peroxide.

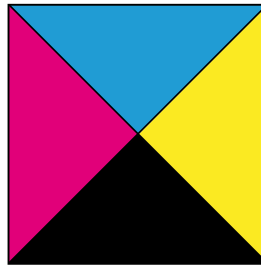

The proportion for mixing colourant and colour developer must always be 1:1

SPECIFIC CAUTIONS

If you experience a reaction during the application, such as stinging, burning, irritation or a rash on the scalp, rinse immediately and discontinue use. If you experience difficulty breathing, a rapidly spreading skin rash, dizziness or faintness and/or swelling to eyes/face, seek immediate medical attention. Before colouring your hair again you should consult a doctor.

- Keep out of reach of children.
- Always wear the gloves provided.
- Avoid contact with eyes. Rinse immediately if product comes into contact with them with plenty of water. Visit your doctor if irritation persists. (If you wear contact lenses, remove them before rinsing).
- This product is designed for use on the scalp area only. Do not use to dye eyelashes or eyebrows or any other areas of hair, such as facial hair.
- Avoid any unnecessary contact with the skin.
- Do not inhale or ingest the product.
- Prepare and apply the mixture in a well-ventilated area.
- If your hair has been permed, bleached or relaxed recently, wait at least 2 weeks before applying Naturtint® Root Retouch.
- Always complete the colour strand test to check you will achieve your desired colour result.
- If, during the days following application, you experience itching, redness, spots, swelling, blisters and/or oozing of the eyes, face and/or scalp seek medical attention.
- For all questions concerning your individual sensitivity, consult your doctor.
- We recommend using Naturtint Root Retouch 15 days after your regular colour application, when the roots are visible but still short. The application should be focused on the hairline around the face, parting and temples.
